

At a Glance

Students are able to earn a major or minor in psychology and participate in the department's honors program.

Students can customize their psychology major to better prepare them for careers or graduate studies in a variety of areas, such as clinical or counseling professions, developmental studies, neuroscience, human resources and a host of other fields.

A psychology major provides excellent background for careers in business, law, medicine, seminary and education. Like the recent graduate who is working for Lutheran World Relief as the fair trade projects coordinator, you can find a way to pair your psychology major with your interests and talents.

PSYCHOLOGY

"The department truly has the best teachers. Not only are they there to guide and educate you, but they are friendly and accessible. I also gained research and teaching experience, which was the stepping stone to my career."

– Perna Bholah '07
Ph.D. student at the University of North Carolina, Chapel Hill

CONCORDIA
COLLEGE
Moorhead, Minnesota

Why Study Psychology Here?

We offer outstanding opportunities to do research alongside faculty, top-notch preparation for graduate schools, membership in national honor societies and study abroad programs.

1.

Conduct research in the lab or field and present your findings

at annual conferences such as the Red River Psychology Conference or perhaps the prestigious American Psychological Association.

2.

Study abroad or take a psychology travel seminar

to Norway, England, Australia, the Mediterranean and more.

3.

Put your knowledge to practical use

and gain valuable career experience at a juvenile detention center, a local youth program, a crisis center or a mental health treatment facility.

Did You Know?

Concordia psychology students have been studying the effects of hurricane and flood disaster relief efforts with a trauma specialist.

4.

Sample and analyze your own stress hormone levels in a Behavioral Neuroscience class.

5.

Take classes and engage in discussions with dedicated, award-winning professors, including a Fulbright Scholar.
